Jan,2015 - Present

Namagasht

working on various projects with various programming languages / frameworks such as Joomla , Laravel , Node JS , Angular , Symfony , Perl , Java , ionic , ... main projects are listed below

- Namagasht / Travel Agency Management System
- Travel Agency Management System , hardware (odroid) and software (php/node js) comes together to make the best system for travel agencies with these features : Sales management , CRM , Accounting , Caller Id (satel / telsa) , attendance management , and other tools based on what agencies need.
- TRIP / CRS
- Online CRS for searching , booking tickets and hotels from all around the world using SOAP/REST Api from Mahan (airline) , Parto Api and Mystify Api
- Nazmie / Attendance Management
- Hardware (raspberry pi / fpm10a) and software (backend rest api / frontend angular / mobile ionic / node js electron for hardware display) comes together for building smart attendance management system which connects to Namagasht project using api for

calculating salaries and so on.

we also use web socket and GCM for notifications and implementing serial port protocol for fpm10a module using node js

- Sarzamin Sabz / Tour System
- online website for travel agencies to sell their tours , accommodation and tourguide , fully connected to namagasht system using rest api

Skills

Java

- Hibernate
- Struts
- Spring
- jBPM
- EJB
- Web Service
- Swing

PHP

- Symfony
- Symfony 2 / 3
- FOS Rest / Nelmio Api Doc
- Doctrine
- Web Service (SOAP , RESTful)
- Joomla
- Laravel
- Swift Mailer
- PHPExcel
- mPDF
- XDebug
- ...

Node JS

- NPM
- Electron
- Web Socket Server
- Serial Port

Web Technologies

- HTML5
- CSS3
- Responsive Web Design
- Ajax
- Angular (ui router , resource , filter , directive , modules)
- Web Socket
- Bootstrap
- jQuery
- Foundation
- SASS
- CGI
- Ext JS
- Bower
- Gulp
- Admin LTE / Gentella
- SEO
- Wordpress
- ...
